Create,
design,
deliver.

The simplicity of design finds its line

The frame flush with the wall

magis40 is design freedom. Freedom to express yourself and create new spaces with high living comfort. The room to be designed is not perturbed, which means that designers can freely create vertical elements, expressing their creativity with no constraints. The window becomes a fluid, subtle object that blends in with the home decor. For the first time, you can choose a window that is more of a design element than a technical one. magis40 leaves room for imagination and design.

A conscious choice

Sustainable

magis40 has a core made
of glued laminated timber,
because, for us, natural
materials are always in
vogue.

The glued laminated timber
bar optimises the use of
trees, without waste.

AND TRADE FAIRS

A close-up photograph of a window frame. The frame is made of light-colored wood, showing a clear grain. A thin, dark aluminium shield is visible, covering the outer part of the frame. The background is a bright, out-of-focus white surface.

The perfect combination

Wood - Aluminium

magis40 has a wooden frame inside, to offer the excellence of nature and, outside, it comes with a protective aluminium shield so as to avoid any kind of maintenance. A range of windows that remain unchanged over time, both in terms of aesthetics and functionality.

WINDOW SECTION

Outfit

With magis40, the outfit concept enters the world of windows.

magis40 is a concept that stimulates the creativity of designers and window and door manufacturers. A skilful, sophisticated mix that leaves plenty of freedom to interpret, experience and decorate windows with accessories and combinations to suit your style. We have designed our look down to the smallest detail, you can create your favourite outfit.

The productive system of uni_one is supported by software that guides the operator step-by-step throughout all the stages of estimating and processing the order. In addition to processing offers and orders, the software automatically compiles and prints all the documentation relating to the CE marking and is equipped with a machine connection for the transfer of data to the production workshop.
